1 General Instructions

The following pages represent the WAWF Data Element/Segment Cross Reference for reporting 810C Navy Shipbuilding Invoice EDI data into WAWF. The tables that follow present the usage of the Segments and Data Elements arrayed in Transaction Set Order. Only the Segments that WAWF accepts are outlined below. The information represents 810C (Navy Shipbuilding Invoice) X12 transactions into Wide Area Workflow (WAWF). This EDI Guide was created using the latest draft of the Implementation Conventions.

NOTE: If using a word processor program (i.e. Microsoft Word, WordPerfect, Microsoft WordPad, Microsoft Write, etc.) to create EDI files, then the text must first be cut/copied out of the word processor program and pasted into Microsoft Notepad, or another ASCII text editor and saved in the text editor, before sending the data to WAWF. This converts the text to text-only format and removes control characters that contain formatting information.

Sending Attachments to WAWF:

To send attachments to WAWF that are related to an EDI transaction via SFTP, Vendors must use the attachment code "E9" (See REF Segment at Pos. 050) to associate the attachment with the transaction.

WAWF provides Vendors the capability to manually FTP over attachments electronically. These attachments can then be referenced and attached to inbound EDI transactions. Please contact the Help Desk for assistance in setting up a directory on the FTP server to submit attachments using this method. Once set up with a directory, Vendors will need to FTP over their file as a separate action from submitting the EDI file. The attachment needs to be present on the server at the time the inbound EDI file is processed by WAWF.

To send attachments to WAWF via EDI, Vendors may also use the 841 EDI Transaction Set. Vendors may not use the 841 EDI Transaction Set for anything other than sending attachments.

Please refer to the EDI_WAWF_Guide.doc for detailed EDI enveloping instructions for attachment data as only one document (i.e. one Transaction Set) can be transmitted with one 841 in an ISA/IEA when attachment data is submitted to WAWF.

An attachment transaction must be submitted with this document or WAWF will reject the 810C NSI transaction.

WARNING: Wide Area Workflow (WAWF) is designated for Sensitive Unclassified information ONLY. Do NOT upload classified attachments into WAWF.

Each Segment table includes the following:

1.	Data Segment	X12 Segment
т.	Data Deginent	1112 Degillellt

2. Description X12 Name

3. Element X12 Data Element Reference Number

4. Format & Min/Max Specific to WAWF, not ANSI X12

5. Requirements Depicts whether the Segment is:

M – Mandatory – Usage is required.

O – Optional – Can be used or not used.

C – Conditional – Contingent upon other criteria being met. (Field is not mandatory or optional, e.g. Extension Fields to Department of Defense Activity Address Codes (DoDAAC); use if a DoDAAC is present.) See Notes Column for specific instructions.

N/A – Not Allowed

6. WAWF Notes Contains notations of the Field's usage or restrictions

Fields included within WAWF display the "Type" Field depicting the value used.

- Nv Numeric Field where v = number of decimal positions, decimal implied (i.e. 300 will be read as 3.00)
- R Decimal number. If value includes decimal, then WAWF requires decimal point and value be sent: WAWF will NOT imply or assume decimal points. Examples:
 - o 300 will be read into WAWF as "300"
 - o 3.00 will be read into WAWF as "3"
 - o 3.5 will be read into WAWF as "3.5"
- **ID** Identifier
- AN Alphanumeric String
- **DT** All Date Fields will use the format CCYYMMDD
- TM All Time Fields will use the format HHMMSS

Notes:

- Above and below each Segment there are notes pertaining to WAWF. The values that WAWF accepts are also noted. WAWF ignores all codes not identified in this guide.
- The word "must" in a Segment Note implies that the Segment is mandatory. The word "may" in a Segment Note implies that this Segment is Conditional based on the terms of the contract or the needs of the contractor.
- The NSI document applies to One Pay, Navy ERP, and Standard pay systems only.
- Currency codes that allow exactly two positions to the right of the decimal may be submitted via EDI.
- Currency codes that allow greater than two positions to the right of the decimal may NOT be submitted via EDI.
- Currency codes that allow zero or one position to the right of the decimal may be submitted via EDI, however, the following rules will be applied:
 - When the amount field is defined as a numeric field (N2), the decimal positions must be submitted with one or two zeros as needed to meet the X12 requirement that exactly two decimals are required for N2 fields.
 - When the amount field is defined as a decimal number field (R) or an alpha/numeric string (AN),
 - The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.
 - The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
 - If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.
- If an Invoice is submitted and identified as a possible duplicate, the log will include the following warning message: "Please verify that this document is not a duplicate of INVNO001." This validation will not prevent the document from being created. Invoices are identified as a possible duplicate when the following criteria is met:
 - o Contract Number and Delivery Order Number match.
 - o Request/Invoice/Voucher Number match, excluding the trailing alpha character.
 - o Previously submitted document status is not void.

- o Invoices must have the same gross amount.
- o Period of Performance Dates, Service Start/End Dates, and Estimated Delivery Date match.
- o For each matching Line Item, the Quantity Shipped and Unit Price match.
- Any changes in the FTP/EDI file to values that are in EDA for this Contract may require a Contract Modification. Please contact the cognizant Contract Administration Office listed in your contract/order for authorization prior to making any changes to the terms and conditions.

1.3 NTE Segment – Note/Special Instruction, Pos. 030 – Header

NOTES: There may be only one instance of the NTE Segment when NTE01="ZZZ".

There may be multiple instances of the NTE Segment when NTE01="ADD".

The NTE Segment with NTE01="ZZZ" is optional. The Shipment Number on the NSI document will default to the Invoice Number.

Comments are mandatory if there is a previously submitted final Invoice against the Contract Number and Delivery Order.

Use the NTE instead of the REF segment at Pos. 050 – Header.

NTE^ADD^These are the initiators document level comments.

NTE01 - Reference Codes

ZZZ – Reference Shipment Number

ADD – Document Level Comments

Notes:

- The delimiter character "^" is not allowed in comments.
- The comments will be concatenated into a single comment which may not exceed 2000 characters.

1.4 CUR Segment - Currency, Pos. 040 - Header

NOTE: There may be one instance of CUR Segment per transaction.

Segment	Description	Element	WAWF Min/Max	WAWF Req.	WAWF Notes	Type
CUR01	Entity ID Code	98	2/2	M	WAWF only accepts "BY" for Buying Party (Purchaser). "BY" must be capitalized.	ID

REF^ACC^Draft (Draft Indicator)

Notes:

• The attachment referenced by the "E9" code in the table above represents functionality whereby an attachment can be submitted independently and associated to a submitted EDI transaction. Vendors have the ability to have the SAM set up an attachment directory that

will allow the vendor to submit attachments for EDI transactions directly to the FTP Server.

- There may be multiple instances of attachments per transaction as long as the total number of REF instances does not exceed 12.
- When EDI submissions are identified as a "Draft", the system will process them inbound using the following minimal data set requirements:
 - Vendor CAGE
 - o Contract Number Type (Defaults to DoD Contract (FAR) if not entered)
 - o Contract Number
 - o Delivery Order Number
 - o Pay Official DoDAAC
 - Document Type
 - o Routing DoDAACs depending on the document type and pay system
 - o Invoice/Shipment Number depending on the document type
 - o If any Line Item data is submitted, the Item No is mandatory
- Once submitted as a "Draft", all documents must be processed via the web interface using the current "Save and Continue" functionality. There will be no ability to "add to a document" via additional electronic submissions.

REF01 - Reference Id Qualifier

- E9 Attachment Code
- CT Reference procurement Instrument Number or GSA Number
- KL Contract Reference
- ACC Status (used to capture the Draft Indicator)

1.6 N1 Segment – Name Segment, Pos. 070 – Header

NOTES: There must be at least four instances of the N1 per Loop.

If N102 is entered, follow WAWF specific requirements below for entering Address data. If all Address Fields are left blank (N102, N2, N3, and N4) Address information will be defaulted.

All addressing Segments (N102, N3, and N4) must be **completed** if an address is being entered. If a Location Code is being entered, then addressing data is not necessary. If Address data is being entered, these Fields at a minimum must be entered:

- For U.S. Addresses, Fields N102, N301, N401, N402, and N403 are the minimum required to complete the Address. Other Fields are optional.
- For Non-U.S. Addresses, Fields N102, N301, N401, N402, N403, and N404 are the minimum required to complete the Address. Other Fields are optional.
- For U.S. Military Addresses, Fields N102, N301, N403, N405, and N406 are the minimum required to complete the Address. Other Fields are optional.

For entry of an APO/FPO address, enter the APO/FPO Zip Code in the N403, the Military Address Indicator (i.e. AR) in the N405 and the APO/FPO code (i.e. AA, AE, or AP) in the N406.

The N1 loop may also be used to submit email addresses to which WAWF will forward an additional workflow notice for the document. When submitting email addresses, only the N1 and PER segments should be submitted in the N1 loop.

Segment	Description	Element	WAWF Min/Max	WAWF Req.	WAWF Notes	Type
N101	Entity Identifier	98	2/2	M	See codes below. To submit email addresses to which an additional workflow notice should be sent, submit "FE" in N101.	ID
N102	Name – Free form name	93	1/60	С	Name (Activity1) – Mandatory only if Address data is being entered, otherwise should not be entered. To submit email addresses to which an additional workflow notice should be sent, enter the name of the organization in N102 when N101 = "FE".	AN
N103	Identification Code Qualifier	66	1/2	С	Mandatory when submitting address data. 10 DoDAAC 33 CAGE	ID

					A2 MAPAC	
					Not used when submitting email addresses to which an additional workflow notice should be sent.	
N104	Identification Code	67	5/19	С	Mandatory when submitting address data.	AN
					DoDAAC, CAGE, or MAPAC	
					Extensions are not allowed when N101 has an identifier code of BY, C4 or PR.	
					Not used when submitting email addresses to which an additional workflow notice should be sent.

Payment Systems Requirement Notes:

- WAWF will reject transactions with codes other than those listed below.
- Vendor (PE) is mandatory.
- Pay Office DoDAAC (PR) is mandatory and must be a valid DoDAAC.
- Admin DoDAAC (C4) is mandatory and must be a valid DoDAAC.
- Ship To (ST) is mandatory and must be a valid location code.
- If Ship to DODAAC is Navy ERP then and Inspect By DoDAAC (L1) is not allowed.

11

- Issue By DoDAAC (BY) is optional and must be a valid DoDAAC, however, if it is available, entering it is strongly advised.
- LPO (PO) is mandatory for One Pay and must be a valid SUPSHIP DoDAAC. LPO is not allowed for Navy ERP or Standard.
- Inspect By DoDAACs (L1) is optional for One Pay and not allowed when the Ship To DoDAAC is Navy ERP.
- A Contractor DoDAAC may be submitted in any field where a CAGE is permitted except where N101 = PE for Vendor.

Note:

N101 Codes (C4, PR, PE and ST are the minimum submission requirement)

N101 - Entity Identifier Codes

1.11 IT1 Segment – Base Item Data, Pos. 010 – Detail

NOTES: There must be one instance of IT1 per Line Item (IT1) Loop with up to 999 loops per transaction for WAWF.

The 999-loop maximum must be reduced by the number of SAC or TXI items included on the Invoice.

Segment	Description	Element	WAWF Min/Max	WAWF Req.	WAWF Notes	Type
IT101	Assigned Identification – CLIN, SLIN or ELIN	350	4/6	М	Line Item Number If characters are sent in lowercase, then they will be converted to uppercase.	AN
					The letters "I" and "O" may not be used within the Line Item Number.	
	One Pay		4/6		4 N or 4 N PLUS 2 A	
	Navy ERP		4/6		CLIN (4N), SLIN (4N + 2AN) or ELIN (1A + 3AN)	
	MOCAS		4/6		4N, 4N2A, 1A3AN, "NONE" or "NONE"NN	
IT102	Quantity Invoiced	358	1/10	М	Enter "1" to satisfy the X12 requirement of mandatory entry and allow it to pass through GEX.	N
					The value will not be validated by WAWF and will not display on the NSI document.	
IT103	Unit or Basis of Measurement Code	355	2/2	М	Unit of Measure Codes.	ID
					Enter "EA" to satisfy the X12 requirement of mandatory entry and allow it to pass through GEX.	
					The value will not be validated by WAWF and will not display on the NSI document.	

IT104 Unit Price	212	1/14	М	For NSI documents enter the Amount Billed. Amount Billed is affected by currency code. See	R11.2
				notes below. Positive, negative or zero Amount Billed values are allowed; however, the Document Total Amount (sum of all Amount Billed values) must be positive.	

Samples:

Notes:

Upon submission, WAWF will attempt to prepopulate the AAI value from the EDA contract data for all line items in the file. If no AAI was submitted for a given line item and a value is found, the AAI will be systematically added to the document submission. If an AAI was submitted but a more accurate value was found, the submitted AAI will be overwritten and an informational message provided.

IT104 – Amount Billed

Currency codes that allow exactly two positions to the right of the decimal may be submitted via EDI.

Currency codes that allow greater than two positions to the right of the decimal may NOT be submitted via EDI.

Currency codes that allow zero or one position to the right of the decimal may be submitted via EDI, however, the following rules will be applied:

- When the amount field is defined as a numeric field (N2), the decimal positions must be submitted with one or two zeros as needed to meet the X12 requirement that exactly two decimals are required for N2 fields.
- When the amount field is defined as a decimal number field (R) or an alpha/numeric string (AN),
 - The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.

- The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
- o If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.

1.12 PID Segment – Product/Item Description, Pos. 060 – Detail

NOTE: There must be at least one, with a maximum of 25, instances of PID per IT1 loop.
