AMT Listing

Search Type – Award Number Search

AMT Listing information populates on a new page; displayed sections depend on the selected search type. When Award Number Search is the selected type, **Award Details** and **DCMA Members** sections display.

Award Details:
(Award Details fields are auto-populated with information when Award Number Search is selected in the Search Type Field)

- Award Number *(Field is sourced from SDW or EDA. System prioritizes SDW for DCMA and EDA for all other agencies)*
- Order Number *(Field is sourced from SDW or EDA. System prioritizes SDW for DCMA and EDA for all other agencies)*
- Base Contract *(Field is sourced from SDW or EDA. System prioritizes SDW for DCMA and EDA for all other agencies)*
- Program Code
- CAGE Code *(Field is sourced from SDW or EDA. System prioritizes SDW for DCMA and EDA for all other agencies)*
- Company Name *(Field is sourced from PIEE)*
- Location (City, State, Country) *(Field is sourced from PIEE)*
- Issue DoDAAC *(Field is sourced from SDW or EDA. System prioritizes SDW for DCMA and EDA for all other agencies)*
- Admin DoDAAC *(Field is sourced from SDW or EDA. System prioritizes SDW for DCMA and EDA for all other agencies)*
- Payment Office *(Field is sourced from SDW or EDA. System prioritizes SDW for DCMA and EDA for all other agencies)*
- CASD CAO *(Field is sourced from the CASD functionality in PCM)*
- DCMA DoDAAC *(Field is sourced from PIEE)*
- ACO Code *(Field is sourced from SDW)*

NOTE: For DCMA, SDW is the prioritized data source. The system first searches SDW for the contract, if it is not found, the system then searches EDA. If one of the data sources contains the contract, but not all the field data, then those fields are left blank. If neither SDW or EDA has the searched contract, then the sections will appear blank, and a warning message appears.

AMT Mapping Description:

AMT Mapping Types

Mapping Level	Mapping Name	Mapping Description
1	Exact Award / Order Number	Maps AMT personnel to a specific award/order. This allows for a large award or award with special personnel needs to have a unique support AMT. If an award is entered without an order, the AMT Search Results will display only mappings of awards without an order.
2	Partial Award Number and CAGE Code	Maps AMT personnel to an award and all of its orders for a specified CAGE Code. This allows for a delivery order vehicle to have the same support AMT regardless of order, or to set up a mapping for all the awards with the same Issue By DoDAAC (first six characters of the award), and limits returns to a single CAGE.
3	Partial Award Number and DoDAAC	Maps AMT personnel to all orders on a given award. This allows for a delivery order vehicle to have the same support AMT regardless of order number or to set up a mapping for all the awards with the same Issue By DoDAAC (first six characters of the award), and limits returns to a CMO DoDAAC.
4	ACO Code and CAGE Code	Maps AMT personnel to all awards assigned to an ACO code for one CAGE Code. This provides for the case of a large CAGE Code split between multiple support AMTs based on the ACO code assigned in MOCAS and the CAGE Code of the award.
5	CAGE Code	Maps AMT personnel to all awards for a CAGE Code. This allows for all awards for the same CAGE Code to have the same support AMT.
6	ACO Code	Maps AMT personnel to all awards assigned to an ACO code. This allows for all awards for the same ACO code to have the same support AMT.
7	DoDAAC	Maps AMT personnel to all awards assigned to a DoDAAC. This could potentially be different from the Administered By DoDAAC as specified in MOCAS (i.e. as is the case for Pay Only awards whereby MOCAS pays the award, but it is not administered by DCMA). This allows for all awards for the same DoDAAC to have the same support AMT. At a minimum, the roles for ACO, QAR, ENG, and IS must have personnel mapped at the CMO DoDAAC level, as well as the PA, SS, SP, EVS, and AO functional roles.
