When the search results are returned, the **Export** dropdown button allows the user to export search results in CSV or Excel format for import to a spreadsheet. For this guide, the Excel format is being used.

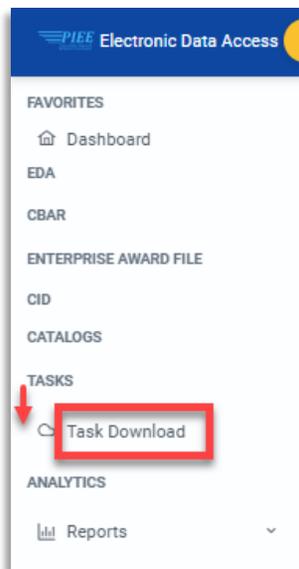

After the Excel link is selected a message appears to inform the user that the requested download has begun and can be found in the Task Download section of the EDA Homepage menu.

## Exporting Search Results

In the Task section of the EDA Dashboard, select **Task Download**.

Find the requested report in the Job List and select the **Jobs** button in the Action column.

Part: If you don't see all the parts available then it means that the data are still being extracted. This usually happens for a huge amount of data extraction.

Download: Using 'Direct Download' will allow you to download artifacts in parallel and download speed will be significantly faster for large artifacts. Use 'Download via EDA App' option if you run into any firewall issue.

Exported zip files may need to have their names shortened to unzip due to a file path limitation in Windows.
