Click the "Add UID" link to add UIDs to the document.

From the "UID Type" list you will select the construct format of the unique identifier. The unique identifier is constructed by combining specific data elements which you will have entered onto this form, structured according to the DoD's UID Program Office business rules.

Note: The UID Type chosen helps determine what fields are mandatory entries and what fields are optional entries.

	In the e Numbe must h alphan	example below, the choic r determined that the En ave a DUNS code betwee umeric characters.	e of UN - DUNS terprise Identifier n 5 to 13
Seve UID Previous Save Draft Document Holp			

The Enterprise Identifier is a code uniquely assigned to an enterprise by the issuing agency (registration authority). An enterprise is the business, organization, firm, or government activity that controls the production of an item.

Your choice of Issuing Agency Code determines the data requirements of the Enterprise Identifier entry.

If you had selected an Issuing Agency Code of "D - CAGE," then a 5 character CAGE code would be accepted into the Enterprise identifier field.

If you had selected an Issuing Agency Code of "LD - DoDAAC," then a 6 character DoDAAC would be accepted into the Enterprise Identifier field.

In the example below, the choice of UN - DUNS Number determined that the Enterprise Identifier must have a DUNS code between 5 to 13 alphanumeric characters. The Warranty field is an optional field. Select "Y" if a Warranty is provided with the item or "N" if no Warranty is provided.

Error messages are displayed for the invalid information entered.

Click the "Delete UID" Actions link. Then click the "OK" button in the Popup to delete the bad UID and Serial Number.

To save the UIDs added and return to the UID tab, click the "Save UID" button. The "Save Draft Document" button is available on each tab. The Vendor can save an incomplete document by clicking the "Save Draft Document" button. The Save and Continue functionality allows the user to save the document in its current state and either continue working on it, or come back to it later.

You are returned to the original UID tab. All the items within the one enterprise identifier and/or part number are listed.

Now that the UID has been added, you are able to identify if any of the subcomponents of this item are Government Furnished Property (GFP) or Non-GFP.

Additionally, if there are any subcomponents which require their own Embedded UID, you are able to provide those here by clicking the "Add Embedded UID" link.
