## GEX Pre-Validations

GEX Pre-Validations is an optional step, but it is recommended and is ran when submitting a document in MDO. The feature is available on the Submit Document pop-up after clicking the appropriate Submit button before fully submitting the document.

MDO Validations will also run and indicate their own success or errors. If there are no MDO validation errors, the pop-up will display with the MDO Validation success message. The GEX Pre-Validations are run from here separately.

### Pop-up Name: Submit Document

It is recommended you select the 'Perform GEX Pre-Validation' option prior to submission. This will inform you of any errors returned from the external GEX document validations.

Click the **Perform GEX Pre-Validation** button.

If there are GEX Pre-Validation errors, a message is displayed, "GEX Pre-Validation returned errors. You may select 'GEX Pre-Validation Results' to view the errors, or continue submitting the document."

Otherwise, a success message displays "GEX Pre-Validation was successful."

After running the validation, a new button is available, **View GEX Pre-Validation Results**.

Click the **View GEX Pre-Validation Results** button.
