

Welcome to Wide Area Workflow e-Business Suite.
 This demonstration contains audio narrative. Please adjust your volume accordingly.

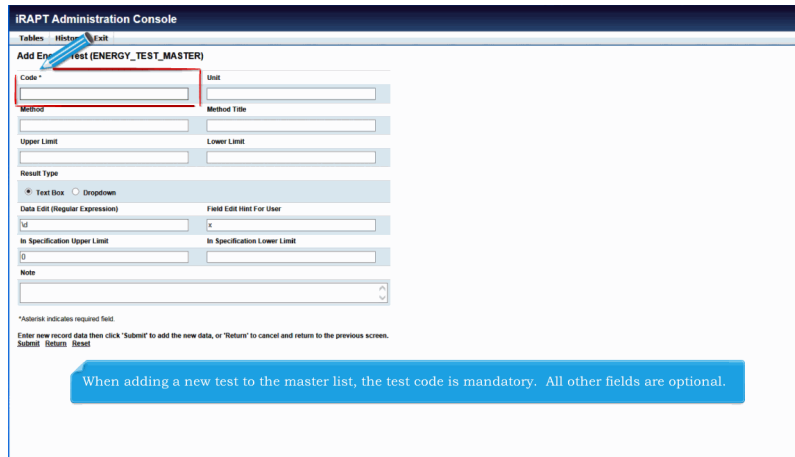

This presentation is an overview of ECP0813, Reorganization of Test Code Management.

The DLA Energy Admin has a new menu option for the Energy Test Master List.

After selecting the new menu option, the DLA Energy Admin will be able to search for, add, edit, and delete from the Energy Test Master List.

Note

WARNING: When deleting a test from the master list, all tests with this Test Code will be deleted from any Commodity/Sub Commodity that they belong to.

Click the "Submit" link to delete, or click the "Return" to cancel and return to the previous screen.

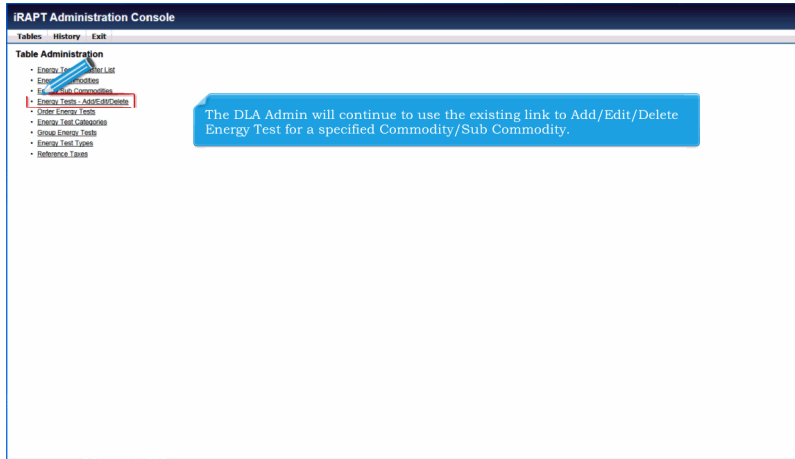

Submit Return

When deleting a test from the master list, all tests with that Test Code will be deleted for each Commodity/Sub Commodity.

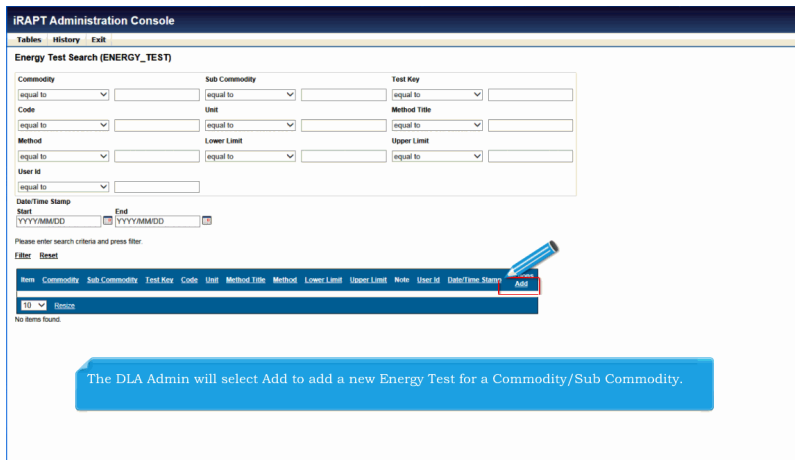

This will delete all tests with that Test Code, regardless of whether they have been locally modified or not.

When deleting a test from the master list, all tests with that Test Code will be deleted for each Commodity/Sub Commodity.

This will delete all tests with that Test Code, regardless of whether they have been locally modified or not.

The DLA Admin will continue to use the existing link to Add/Edit/Delete Energy Test for a specified Commodity/Sub Commodity.

The DLA Admin will select Add to add a new Energy Test for a Commodity/Sub Commodity.
